

# **Rules Of The Road For Useful Security Metrics**

**PANEL**

# Participants

Moderator: Dr. Anton Chuvakin

Participants:

- Jason Leuenberger, E&Y
- Adam Montville, Tripwire
- Anoop Singhal, NIST

# Questions

- How do you define “security metrics”?
- What, in your opinion, is the purpose of having security metrics?
- Can we hope to develop standard ways for measuring security?
- If yes, what can help it? If not, why not?
- What differentiates useful and useless security metrics?
- What are the rules to follow when starting off on that road to useful security metrics?
